There will be two options for ordering Winter tires in Canadian markets:

Individual tires can be ordered directly through your Polestar TireLink account.

Complete mounted kits must be ordered via email at the email address below:

polestar.assemblies@tirelink.ca

Please make sure that your email contains the following info:

- Retailer code
- Retailer name
- Contact person and number for the Service Point
- Delivery location (complete address with postal code)
- Part numbers and quantities
- P/O reference number or customer name reference
- Please copy James Dorais for order visibility at james.dorais@polestar.com
- All assemblies are shipped out of L'Assomption Quebec, therefore shipping time needs to be taken into consideration (e.g. up to 7 business days for Vancouver)
- You can fit 4 kits (16 wheels on a skid). Please think about this when placing orders, this helps to keep shipping costs low and reduce waste.

New car orders/volumes are increasing quickly, so it would be logical to keep a small inventory of the kits. The new car sales mix is about 33% Performance and 66% non-performance. It is recommended to have a minimum of 2 Performance and 4 non-performance kits in-stock at all times.

Please see the following page for product info.

Polestar 2

Winter wheels
