Cummins Powerplant - Fault Code SPN 1081 FMI 31 - Engine Wait to Start Lamp, Condition Exists - Model Year 2018

👍 👎

› **Internal Content**

If the symptoms described above are encountered on a Cummins-powered vehicle:

1. In Premium Tech Tool (PTT) under the Program tab, run Operation 1700-22-03-06 Accessory Kit.

2. In the Accessory Kit number entry field, enter **85154873**.

3. Click **Program**.

4. Allow the operation to complete and click **Exit**.

5. Program the Instrument Cluster (MID 140).

6. Verify that the fault code is no longer set at startup.

If the issue persists following programming:

Open an eService case. The case must include:

• A description of the issue, this fault code, and any other relevant information, especially <u>any other symptoms</u> that may be present.

• A description of work performed.

• A complete, current DTC Readout.

• This solution number.
