Tracerline Extended-Life Coolant Dye VAH, VN, VHD, VT

Tracerline Extended-Life Coolant Dye

The Tracerline® extended-life coolant dye is available for all VOLVO vehicles. This coolant dye can be used to perform diagnostic testing when checking for coolant leaks on the engine or other chassis components. This dye is specially formulated to not discolor the extended life coolant in a way that would make it look contaminated. The part number for this special tool is **85132600**. Each kit contains enough coolant dye to treat any VOLVO vehicle. Order this part through the VOLVO parts system.

For instructions on how to use this tool refer to Tracerline's website at: www.tracerline.com/Support/Download Center/Instruction Manuals. The specific document for this product is "Dye-Lite® TP-3940." For additional support contact Tracerline directly at 800-641-1133.
