Product Change Notice - In-wall Slide-out controller enclosure

Dear Valued Customer:

As part of our ongoing effort to reduce supply chain variables, improve quality, and production efficiency, we have updated the fastening technology to our In-Wall controller enclosure to an updated design.

The improved enclosure is a snap-fit design that replaces screws with snap style fasteners built into the enclosure.

the circuit board is locked in place with pin and socket offsets incorporated into the enclosure base and lid. This design provides a stronger and more secure assembly than the tradition fasteners previously used.
