

SEATING

Recliner Seating Position for Maximum Foot Rest Benefit

In order to achieve the maximum foot rest benefit, the proper seating position is required in the retracted position. While extending the recliner, the user's heels should be at the edge of the foot rest and back should be positioned completely against the back rest.

NOTE: Distributing the weight of the body toward the foot rest prevents the foot rest from extending correctly, and may cause user to believe foot rest is not operating properly.

Proper Seating Position

Improper Seating Position

As a supplier of components to the RV industry, safety, education and customer satisfaction are our primary concerns. Should you have any questions, please do not hesitate to contact us at 432-LIPPERT (432-547-7378) or by email at customerservice@lci1.com. Self-help tips, technical documents, product videos and a training class schedule are available at lippert.com or by downloading the LippertNOW app.
