Product Substitution Notice - X180T and X260 controller connectors

Dear Valued Customer:

Please be advised, due to supply shortages, Lippert intends to switch the connector style on X180T and X260 controllers from spring clamp terminal connectors to screw terminal connectors for the OneControl Monitor Panel system.

This temporary change is expected to begin this week on a running basis and continue as inventory dictates.

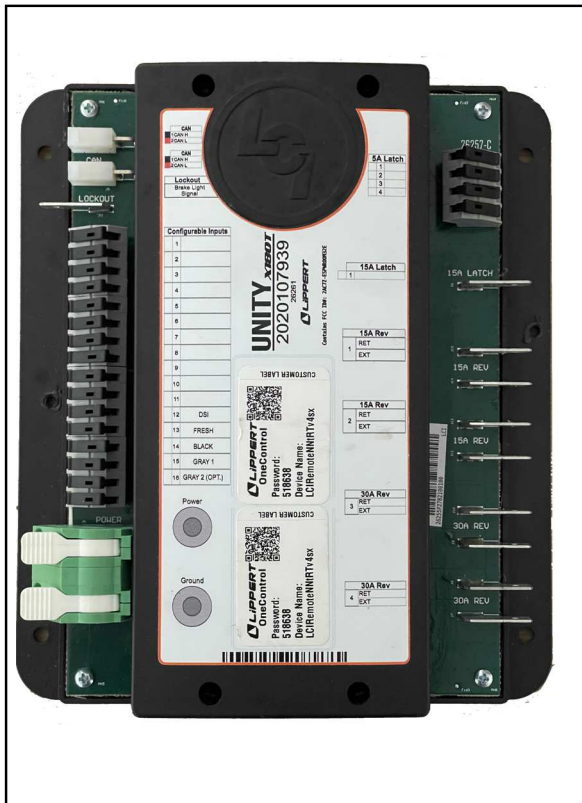

There is no price change or part number change. The controllers are backward compatible with the system with either style connector. Spring clamp-type connectors have levers that flip down to secure the wires, while the substitute connectors require the screws to be tightened down with a screwdriver.

Affected Part Numbers:

X180T – 2020107939

X260 – 2021017755

Current - with spring clamp-style connectors

Substitute - with screw-style connectors

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Wes Bringham
