Product Change Notice – D-Seal Material Change

Dear Valued Customer:

As part of our ongoing efforts to improve our product performance, we will be upgrading our current D-Seal material from EPDM to TPE for all 3000 FV series. Using TPE allows us to increase the height of the seal improving compression without compression set, which increases its overall life. Better compression will yield improvements in resistance to water and air infiltration and reduce vibration.

Products affected are: 3000 FV, FVD, FVSE, SEFV, NV FVSE, NV SEFE, NV VEPW

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Mason Ogle
