PAB1126: OTRUSH R MODULAR BLUETOOTH HELMET

Purpose for Parts and Accessories Bulletin

To inform that the OutRush R Modular Bluetooth helmet has an available firmware update to address a stereo audio concern while connected to the 6.5 GT or GTS radio through the Wireless Headset Interface Module (WHIM).

Markets Affected

All Markets that the OutRush R Modular Bluetooth helmet is available.

Summary

The previous firmware on the OutRush R Modular Bluetooth helmet would only allow audio to come through in mono audio mode when connected to the 6.5 GT or GTS radios through the WHIM. Updating the software to version 1.2 or higher will allow the audio to come through in stereo.

The Bluetooth system supports firmware upgrades. You can update the firmware using the Boom! Audio Device Manager.

Please visit [Infotainment Support Resources](#) to check on the latest software downloads.
