Product Change Notice - Plastic to fiberglass bag door skin

Dear Valued Customer:

Please be advised, Lippert intends to change the skin on Series 13 baggage doors from a PWP/plastic to fiberglass.

The plastic was added to prevent door deflection from thermal damage. We have determined, while the plastic does protect from thermal damage, the fiberglass/foam/fiberglass option is an even better preventative. We are able to provide the fiberglass skin at the same cost as the plastic.

There is no change in installation or operation with the change in skin material. There is no part number change and no price change.

This will be a running change starting as soon as inventory of plastic is depleted.

Current plastic skin

New Fiberglass Skin

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Mason Ogle
