

# MULTI-MODEL (EQUIPPED WITH SKYACTIV-DRIVE) ATF COLOR DETERIORATION

New vehicle automatic transmission fluid (ATF) color is blue. As the vehicle mileage increases, the ATF color changes. The color change does not affect vehicle performance.

Do not use the color of the ATF as part of a diagnosis criteria. The table below shows color change as vehicle mileage increases.

New	3,500 miles	7,500 miles
		
11,000 miles	15,000 miles	18,500 miles
		
22,500 miles	30,000 miles	33,500 miles
