

SSM 50885 - FDRS Alert - 2020-2022 Explorer/Aviator, 2021-2022 F-150 - 10R80 MHT - Transmission Strategy Download

2020-2022 Explorer/Aviator and 2021-2022 F-150 hybrid vehicles equipped with a 10R80 MHT require the Transmission Strategy Download application in the Ford Diagnosis and Repair System (FDRS) to be run after certain transmission or module repairs. The Transmission Strategy Download routine is failing in FDRS levels 32.5.3 and 32.5.4. The FDRS development team is working to resolve this in a future release of FDRS. In the meantime, uninstall FDRS from the computer using the select all function to remove all data and recordings. Reinstall the older FDRS version 31.6.5 using this url - http://www.fordservicecontent.com/Ford_Content/IDS/FDRS/FDRS_31.6.5.exe Once 31.6.5 is installed, download and run the Transmission Strategy Download application.
