

Unable To Retrieve "On Request" Messages For PeopleNet Or Omnitracs Modules Installed On The DL5 Data Link; Third Party Electronic Log Device Not Reporting Certain Data

> Internal Content

This ONLY applies to devices installed on the DL5 data link. If these systems are connected to the DL1 datalink via the aftermarket overlay harness, or the DLC, this parameter change will not be needed.

If a customer advises that their driver computers are not reporting complete data and the module is installed as specified above:

1. Update VECU4 parameter QKH = 1, VECU5 parameter P1SZR = 1

A list of On Request parameters can be found below and may be helpful in confirming that this is the issue.

| " On Request " Messages | |
|-------------------------|--|
| Message | Content |
| AT1S | Diesel Particulate Filter 1 Soot Load Percent 3719 |
| | Diesel Particulate Filter 1 Ash Load Percent 3720 |
| CI | Component ID, etc. |
| HOURS | Engine Total Hours of Operation 247 |
| | Engine Total Revolutions 249 |
| IO | Engine Total Idle Fuel Used 236 |
| | Engine Total Idle Hours 235 |
| LFC | Engine Trip Fuel 182 |
| | Engine Total Fuel Used 250 |
| TD | Time & date |
| VH | Total Vehicle Hours 246 |
| | Total Power Takeoff Hours 248 |
| VI | VIN |
