Case Number: S2123000004

Release Date: 01/26/2021

Symptom/Vehicle Issue: Front Wheel Well Liner Contacting Tire And Or Loose

Discussion: Front wheel liner is designed to be tucked behind the grille. If it is not installed behind the grille the wheel liner may deflect towards the tire and may cause a possible tire rub. See figures below.

Repair Procedure:

- 1) If wheel liner is damaged, replace wheel liner.
- 2) If wheel liner is not damaged:
 - a) If wheel liner is untucked from behind the grille flange, tuck wheel liner behind grille flange
 - b) If push pin missing at wheel liner attachment on body mount behind grille, replace with correct push pin
