ENTRANCE DOOR MAGNETIC HOLDER INSTALLATION INSTRUCTIONS

1. Begin by locating screws under entrance door screw cover. Mark screw locations so they won't interfere during installation (Figure 1)

2. Insert shim between the two catches to allow for spacing during installation. (Figure 2)
3. Fasten catch on door first. Then use #10 x1.5" self-taping screw to screw.
 - a. Note: Start screw with screw gun and then finish snugging by hand to prevent any stripping.

4. Continue by fastening catch on the frame. Use #10 x1.5" self-taping screws. (Figures 4 & 5)
 - a. Note: Start screw with screw gun and finish snugging by hand to prevent stripping.
5. Be sure not to overtighten screws, which could make catch rock back causing loss of magnet contact between catches.

6. Figure 6 and 7 shows what the magnetic holder should look like at completion. Remove shims once completed.

Jayco's sole obligation under our limited warranty is to repair or replace defective materials and/or workmanship deemed our responsibility as determined by Jayco in our sole discretion. Jayco reserves the right to use new and/or remanufactured parts or materials of similar quality to complete any work, and to make parts and/or design changes as appropriate without notice to anyone. Jayco designs and/or materials changes are done without obligation to incorporate such changes in previously manufactured product. Jayco makes every reasonable effort to ensure field remedies will not adversely affect performance and/or safety of the unit. This field remedy is not intended to extend to future performance of this RV, or any of its materials, components or parts beyond the standard warranty period. The RV owner's obligation to notify Jayco, or one of its independent, authorized dealers, of a claimed defect does not modify any obligation placed on the RV owner to contact Jayco directly when attempting to pursue remedies under state or federal law.
