

Porsche Evolution – 1948-2023

The following illustrations are based on the four poster set “Evolution Porsche 1948-2006”. Throughout Porsche history, new model introductions have generally not followed the “normal” model year introduction cycle (September - August).

Combine this with varying world-wide introduction and availability, there are discrepancies in Model Year vs. Production Year from one market to another. In order to reduce any confusion, we have used the term “Period of Production” to indicate the general year of production.

Since this listing is only intended for general identification and familiarity purposes, the vehicle identification number (VIN) should be utilized to positively identify Porsche Vehicles.

Note!

Not all models listed in this reference chart were offered and/or available to the North American market.
