Q7	2020 – 2022		

## Condition

REVISION HISTORY				
Revision	Date	Purpose		
3	-	Revised header (Updated Models)		
2	01/03/2023	Revised header (Updated Models)		
1	08/11/2022	Initial publication		

#### **Customer States:**

- Various warning lamps are on in the instrument cluster (including MIL and/or EPC warning lamps).
- Poor performance.

#### Workshop Findings:

The following DTC is stored in the ECM, J623 (address word 0001):

• P060C00: Control module internal system fault with symptom 30924.

#### **Technical Background**

There is a discrepancy in the engine control unit software.

#### **Production Solution**

This bulletin will be updated when more information is available. A solution is currently under development.

## Service

Please postpone repairs as there is currently no effective repair for the complaint described by the customer.

1. Explain to the customer that a solution is being developed and that no repairs are necessary at this point. Do not replace any components for this condition since this will not resolve the customer's concern.
