Product Change Notice - X180T controller updates

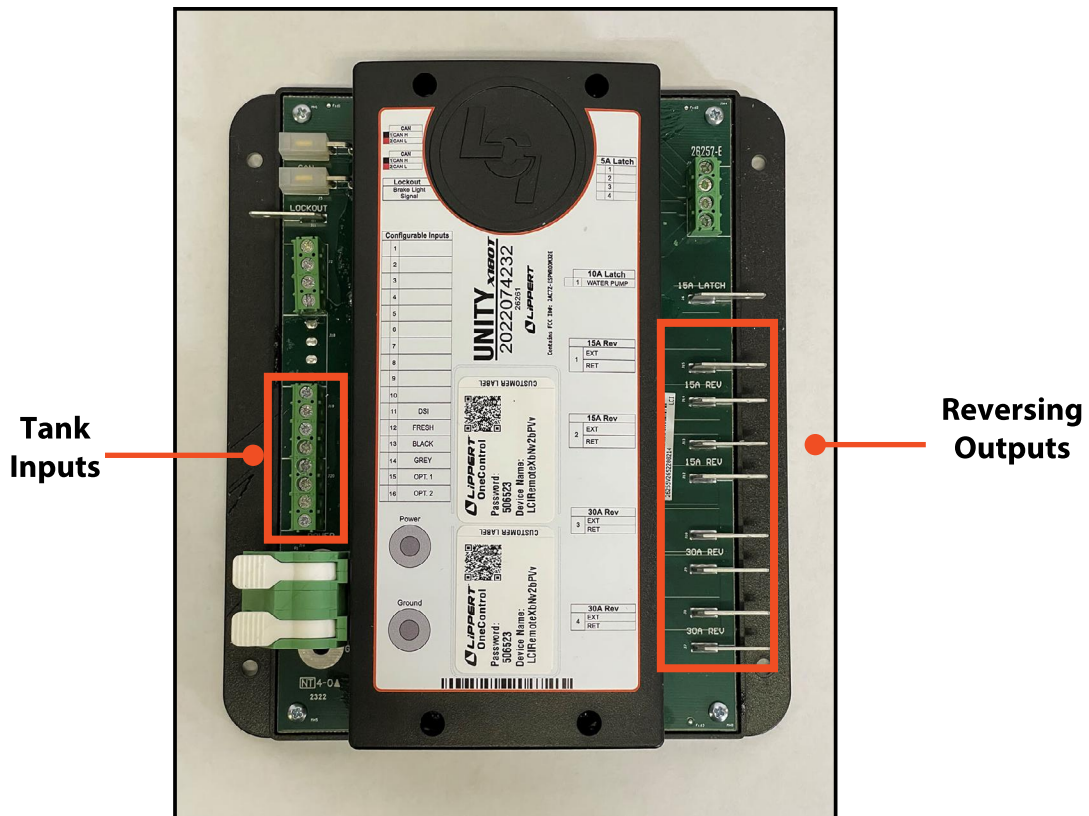

Dear Valued Customer:

In order to provide a more uniform product we are updating our X180T to a version that accommodates five holding tanks. The current version accommodates four holding tanks.

There are slight differences in installation between the current and new controllers:

- All tank inputs on the left side move up one space.
- In order to provide uniformity across all production lines, all of the reversing outputs on the right side are opposite of the current version. (Extend on top and Retract on bottom now).
- New wiring diagrams will be provided.

The change will take place on a running basis, starting around Jan. 16.

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Zachary Inbody

Sales Engineer
