Condition

Customer states:

The acoustic and optical parking aid does not work.

Workshop findings:

The following DTC may be stored in the driver assist systems control unit –J1121- (address word 00A5).

DTC B107A16 Voltage supply for parking aid sensor, voltage too low (symptom 233474).

Technical Background

A software related misdiagnosis may cause the DTC to enter erroneously.

Production Solution

Not Applicable

Service

Please erase the vehicle's DTCs.

No repair is available at this time.

1. Do not perform any repairs. Any repairs for this concern may be denied.
2. Instruct the customer that this condition is normal.

Workaround

- If the vehicle's driver assist control module -J1121- (address word 00A5) is older than SW 0381, please perform the software update in TSB 2069244.
- If the vehicle is already at SW 0381 or newer, the symptoms of this DTC should resolve themselves after an ignition cycle.

Warranty

This TSB is informational only and not applicable to any Audi warranty.

Additional Information

All part and service references provided in this TSB (**2069678**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
