

2023 MY Mustang MACH E
(IPMA)
FPU- 23-PU0210-ALBC_ON

Your system is ready to receive the latest update which will include the following:

Some minor fine-tuning to turn on the In-Lane Repositioning and Lane Change Assist features, if they are not already, so that you can get what you need out of your Ford BlueCruise technology. You'll need to either approve the update or have an automatic schedule set to receive this update.

If you'd like these features turned off, you can find that option through your SYNC® 4A screen. For more information about the features, please see your Owner's Manual.
