

2023 MY Expedition  
(ECG)  
4.2.1

There's Some Good Stuff Here.

Congrats on the purchase of your Ford Expedition® SUV. One of the benefits of owning a connected vehicle is that you receive Ford Power-Up software updates. These updates are delivered wirelessly to your Ford Expedition SUV to help ensure you're always up to date.

This particular update will set you up for all future ones to come. Think of it as the update that opens the door for all the others to enter through.

Some updates will happen in the background while you are driving if you keep Automatic Updates ON. But others require your vehicle to be turned off for a short period of time, which means you can't be behind the wheel. We recommend you set a recurring schedule so they can occur when you do not need to drive — like, while you're sleeping.

Simply go to your in-vehicle SYNC® settings screen and confirm you have Automatic Updates set to ON. Then select Schedule Updates to set your recurring schedule.

Again, these software enhancements are there to improve your vehicle's overall capabilities, including entertainment experiences and new vehicle features.

Ford Power-Up delivers software updates that are designed to make your Ford Expedition® SUV better over time.

2023 MY Expedition  
(TCU)  
4.2.1.2

More enhancements are on the way.

We've made some minor updates to keep everything running smoothly, including improvements to FordPass® Connect modem. There's nothing you need to do.

Ford Power-Up delivers software updates that are designed to make your Ford Expedition® SUV better over time.
