

01-23-06 – Update Programming DTC P0461 or P2450 Stored in Engine/Motor Control Module -*J623*-

Release date:

4/27/2023

Condition

Applicable Vehi	cles				
Model(s)	Year	Eng. Code	Trans. Code	VIN Range From	VIN Range To
Atlas, Atlas Cross Sport	2020-2022	3.6L (CDVC)	All	CA_LC000001	CA_NC9999999

Revision Table			
Instance Number	Published Date	Version Number	Reason For Update
2067868/1	4/27/2023	01-23-06	Original publication.

🕕 Note:

If software updates or flash campaign/actions are performed on a vehicle, a charger with at least 70A charging current MUST be used in order to avoid problems during software updates and flash campaign/actions.

One or more of the following fault codes may be stored in the Engine/Motor Control Module -*J623*- (ECM) Fault Memory:

DTC	Description
P0461	Fuel Level Sensor "A" Circuit Range/Performance
	EVAP System Switching Valve "A" Perfomance/Stuck Open

I Note:

DO NOT diagnose or replace components due to the above faults **before** performing the update function as explained in this bulletin

01-23-06 – Update Programming DTC P0461 or P2450 Stored in Engine/Motor Control Module -*J623*-

Release date:

Technical Background

Certain refueling behaviors can lead to the trigger of erroneous DTC P0461 in current Engine/Motor Control Module -*J623*- software.

Current calibration in the Engine/Motor Control Module -*J623*- software may allow false detections of DTC P2450 over the lifetime of the vehicle.

Production Solution

Implemented improved software at SOP MY23.

Service

Update-Programming Procedure:

<u>Critical Warning</u>: The Midtronics battery charger <u>must</u> be connected to the vehicle battery for the duration of the programming, to ensure the battery state of charge remains above 12.5 volts during the update process. If the battery drops below 12.5 volts, the programming could fail which may result in damage to the control module. Control modules damaged by inadequate voltage will not be covered under the warranty policy. The technician should verify the vehicle voltage prior to starting the update process, and should monitor the voltage for the duration of the update.

The procedure may cancel itself if the hazard warning lights are not switched ON. The hazard warning lights prevent the system from switching to bus sleep mode during the update.

ODIS-Service tester should be updated to the latest GFF technical version 9.0.1 or higher and SW version 2.44.1 or higher.

Radiator Fan(s) may cycle ON high speed during the Update Process! There is a risk that personal injury may result if contact is made with spinning fan blades.

Keep hands and all objects away from Radiator Fan(s) during Update Process!

I Note:

Prior to launching the ODIS Service diagnostic applications and starting control module update process, confirm tester screen saver and power settings in accordance with Diagnostic Device Hardware & Windows® - VHW-20-02 Change Power Options After Windows®10 Upgrade. Failure to do so may result in the tester entering power save mode during data transfer, and subsequent control module failure. When using a VAS 6150/X or 6160/X tester in conjunction with a VAS 6154 wireless transmitter head for a flash procedure, connect a USB cable between the transmitter head and the tester. Failure to do so may lead to errors during the flash procedure.

01-23-06 – Update Programming DTC P0461 or P2450 Stored in Engine/Motor Control Module - J623-

Release date:

4/27/2023

VAS tools must only be used with their power adapters plugged in. Under no circumstances should they be used on battery power alone during the programming procedure.

i Tip:

To Update-Programming using Software Version Management (SVM), review and follow instructions in Technical Bulletin Instance 2014603 "Software Version Management".

The SVM process must be completed in its entirety so the database receives the update confirmation response. A warranty claim may not be reimbursed if there is no confirmation response to support the claim or action is carried out that is not explicitly stated in the Technical Bulletin.

Update the Engine Control Module using the SVM Unit code as listed in the table below:

Model	Engine	Old Software Part No.	Old Software Version	New Software Part No.	New Software Version (or higher)	SVM Unit Code
2020 Atlas	3.6L (CDVC)	03H906026AH 03H906026AG 03H906026AF	9970 9971 9972 9973	03H906026AH 03H906026AG 03H906026AF	9975	4B8A
2020 Atlas Cross Sport	3.6L (CDVC)	03H906026AG	9970 9971 9972 9973	03H906026AG	9975	4B8A
2021 Atlas / Atlas Cross Sport	3.6L (CDVC)	03H906026AJ	0454 0638 1017 1689	03H906026AJ	2666	4B8A
2022 Atlas / Atlas Cross Sport	3.6L (CDVC)	03H906026AT	1922	03H906026AT	2665	4B8A

01-23-06 – Update Programming DTC P0461 or P2450 Stored in Engine/Motor Control Module -*J*623-

Release date:

i Tip:

The procedure can be found in GFF under Functions/ Component Selection, Software Version Management, Adapting Software.

Ensure attached ECM/TCM Tuning Form has been completed and signed by customer as required in SVM Technical Bulletin Instance 2014603.

L

OWNER INFORMATION ABOUT CONTROL MODULE TUNING* ACKNOWLEDGEMENT AND AUTHORIZATION FOR REPROGRAMMING (REFLASHING) OF CONTROL MODULE(S)

*) "TUNING" is described as the addition of or modification of any component which causes a Volkswagen vehicle to perform outside the normal parameters and specifications approved by Volkswagen Group of America / Volkswagen Group Canada.

Date:	
Dealer Number:	_
Vehicle Identification Number:_	
Repair Order Number:	

Dealer stamp

_____, owner or driver of the above identified Volkswagen, confirm:

"Tuning" as described above (especially power increasing modifications) has NOT been performed on my vehicle.

"Tuning" as described above has been performed on my vehicle and the following components were modified or installed:

<u>TUNING was performed by (Please provide Company name and telephone number, if you wish us to contact them):</u>

I understand that if my Control Module is determined to have been tuned, any damage caused by the tuning of the Control Module (including adverse emissions consequences) will not be covered by VWGoA / VGC warranties.

I am permitting an authorized Volkswagen Dealer to reflash (update) my Control Module, and by doing so, I understand that this process will automatically overwrite (destroy) and permanently delete any tuning program that was previously installed on the Control Module of my Volkswagen vehicle.

By signing below, I fully acknowledge and understand that the tuning program will not be restored and VWGoA / VGC, will not be liable in any way for the loss of tuning data.
