

# Service Bulletin

Bulletin No.: 23-NA-020

Date: May, 2023

## TECHNICAL

**Subject:** Oil Leak from Front of Engine

Brand:	Model:	Model Year:		VIN:		Engine:	Transmission:
		from	to	from	to		
Chevrolet	Corvette	2023	2023	—	—	5.5L (RPO LT6)	—

<b>Involved Region or Country</b>	North America, Europe, Israel, Palestine, Japan, Thailand, Australia/New Zealand
<b>Condition</b>	Some customers may comment that there is a visible engine oil leak coming from underneath the middle of the vehicle. During inspection, some technicians may notice that there is a small oil leak coming from the engine front cover area.
<b>Cause</b>	 <p style="text-align: right;">6267588</p> <p>This condition may be caused by improper front cover bolt torque or inadequate sealer adhesion at one of the six T-Joint locations.</p> <ul style="list-style-type: none"> <li>– The oil leak can be found at the T-Joint location where the cylinder head meets the engine block, or at one of the other T-Joint locations (shown in yellow) in the graphic above.</li> </ul>
<b>Correction</b>	To correct this condition, it will be necessary to install new front cover gaskets and follow the revised RTV sealing procedure as noted below.

**Important:** Service agents must comply with all International, Federal, State, Provincial, and/or Local laws applicable to the activities it performs under this bulletin, including but not limited to handling, deploying, preparing, classifying, packaging, marking, labeling, and shipping dangerous goods. In the event of a conflict between the procedures set forth in this bulletin and the laws that apply to your dealership, you must follow those applicable laws.

### Service Procedure

**Important:** Ensure all front cover bolts are torqued in proper sequence and to specification.  
Refer to *Engine Front Cover Replacement* in the Service Manual.

## Additional Information

**Important:** Application of the RTV has changed. Please refer to the picture and steps below for proper RTV application.

6002788

**Note:** The sealing surface must be clean and free of contaminants prior to applying the RTV sealant. Do not touch the sealing surface once it has been cleaned.

1. Clean the sealing surface at the T-Joints (1 and 2) with low VOC brake cleaner, then wipe dry with a clean lint-free cloth.

**Note:** Do not allow RTV to skin over. The engine front cover gaskets and engine front cover must be installed within 8 minutes of RTV application.

2. Apply a 5 mm wide x 15 mm bead of sealant to the 4 T-Joints (1) between the cylinder head-to-engine block and the engine block-to-lower crankcase.
3. Apply a 5 mm wide x 25 mm bead of sealant to the 2 T-Joints (2) between the cylinder head-to-engine block and the engine block-to-lower crankcase.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
