

01-22-02 - Mid Production - Update Programming Engine/Motor Control Module -J623-

Release date:

5/2/2023

Condition

Applicable Vehi	cles				
Model(s)	Year	Eng. Code	Trans. Code	VIN Range From	VIN Range To
Jetta	2019 - 2020	1.4T DGXA, DJXA	All	All	All
Golf	2019 - 2021	1.4T DGXA	All	All	All

Revision Table		-	
Instance Number	Published Date	Version Number	Reason For Update
2065992/4	5/2/2023	01-22-02	Addition of model year 2019 Golf.
2065992/3	5/9/22	01-22-02	Diagnostic Trouble code correction.
2065992/2	3/24/22	01-22-02	Title change due to sister TB publishing.
2065992/1	2/03/22	01-22-02	Original publication.

Customer states there is low or no heat output from the air vents under certain cold weather conditions.

This TB also proactively corrects faults listed below.

Note:

If the customer is experiencing a low/no heat output concern and the ECM part number and software level are not listed below please also check Technical Bulletin 2065975.

This software update also includes modification for: P0441 P04F0 P148D P0496 and P060C (37682) DTCs.

01-22-02 - Mid Production - Update Programming Engine/Motor Release date: 5/2/2023 Control Module - J623-

One or more of the following fault codes may be stored in the Engine Control Module (ECM) Fault Memory:

DTC	Description			
P0441	EVAP Emission Contr.Sys.Incorrect Purge Flow			
P04F0	EVAP system high pressure purge line performance			
P148D	Evaporative Emission System Leak Detection Pump			
	implausible frequency			
P0496	EVAP System High Purge Flow			
P060C (37682)	Internal Control Module Main Processor Performance			

DO NOT diagnose or replace components due to DTCs P0441, P04F0, P148D, P0496, P060C (37682) faults **before** performing the update function as explained in this bulletin.

Technical Background

Current Engine/Motor Control Module -*J623*- software can cause low engine heat output or may lead to various fault codes within the vehicle.

Production Solution

Improved Engine/Motor Control Module - J623- software.

Service

Update-Programming Procedure:

<u>Critical Warning</u>: The Midtronics battery charger <u>must</u> be connected to the vehicle battery for the duration of the programming, to ensure the battery state of charge remains above 12.5 volts during the update process. If the battery drops below 12.5 volts, the programming could fail which may result in damage to the control module. Control modules damaged by inadequate voltage will not be covered under the warranty policy. The technician should verify the vehicle voltage prior to starting the update process, and should monitor the voltage for the duration of the update.

01-22-02 - Mid Production - Update Programming Engine/Motor Rel Control Module -J623-

Release date:

The procedure may cancel itself if the hazard warning lights are not switched ON. The hazard warning lights prevent the system from switching to bus sleep mode during the update.

ODIS-Service tester should be updated to the latest GFF technical version 11.0.0 or higher and SW version 2.47.0 or higher.

Radiator Fan(s) may cycle ON high speed during the Update Process! There is a risk that personal injury may result if contact is made with spinning fan blades.

Keep hands and all objects away from Radiator Fan(s) during Update Process!

1 Note:

Prior to launching the ODIS Service diagnostic applications and starting control module update process, confirm tester screen saver and power settings in accordance with Diagnostic Device Hardware & Windows® - VHW-20-02 Change Power Options After Windows®10 Upgrade. Failure to do so may result in the tester entering power save mode during data transfer, and subsequent control module failure. When using a VAS 6150/X or 6160/X tester in conjunction with a VAS 6154 wireless transmitter head for a flash procedure, connect a USB cable between the transmitter head and the tester. Failure to do so may lead to errors during the flash procedure.

VAS tools must only be used with their power adapters plugged in. Under no circumstances should they be used on battery power alone during the programming procedure.

i TIP:

To Update-Programming using Software Version Management (SVM), **review and follow** instructions in **Technical Bulletin Instance 2014603** "Software Version Management".

The SVM process must be completed in its entirety so the database receives the update confirmation response. A warranty claim may not be reimbursed if there is no confirmation response to support the claim or action is carried out that is not explicitly stated in the Technical Bulletin.

• Update the Engine Control Module using the SVM Unit code as listed in the table below:

¹⁾ Vehicle may be outside any Warranty in which case this Technical Bulletin is informational only.

²⁾ Code per warranty vendor code policy.

³⁾ Labor Time Units (TUs) are subject to change with ELSA updates.

⁴⁾ Documentation required per Warranty Policies and Procedures Manual.

Required Parts and Tools

No Special Parts required.

Tool Description	Tool No:
Midtronics Battery Tester/Charger	GRX3000VAS
	or
	MTRMSP0702 battery maintainer/charger
VAS Diagnostic Tool	VAS 6150/X & VAS 6160/X and
	ODIS Service with current online updates

Additional Information

All part and service references provided in this Technical Bulletin are subject to change and/or removal. Always check with your Parts Dept. and Repair Manuals for the latest information.

L

OWNER INFORMATION ABOUT CONTROL MODULE TUNING* ACKNOWLEDGEMENT AND AUTHORIZATION FOR REPROGRAMMING (REFLASHING) OF CONTROL MODULE(S)

*) "TUNING" is described as the addition of or modification of any component which causes a Volkswagen vehicle to perform outside the normal parameters and specifications approved by Volkswagen Group of America / Volkswagen Group Canada.

Date:	
Dealer Number:	_
Vehicle Identification Number:_	
Repair Order Number:	

Dealer stamp

_____, owner or driver of the above identified Volkswagen, confirm:

"Tuning" as described above (especially power increasing modifications) has NOT been performed on my vehicle.

"Tuning" as described above has been performed on my vehicle and the following components were modified or installed:

<u>TUNING was performed by (Please provide Company name and telephone number, if you wish us to contact them):</u>

I understand that if my Control Module is determined to have been tuned, any damage caused by the tuning of the Control Module (including adverse emissions consequences) will not be covered by VWGoA / VGC warranties.

I am permitting an authorized Volkswagen Dealer to reflash (update) my Control Module, and by doing so, I understand that this process will automatically overwrite (destroy) and permanently delete any tuning program that was previously installed on the Control Module of my Volkswagen vehicle.

By signing below, I fully acknowledge and understand that the tuning program will not be restored and VWGoA / VGC, will not be liable in any way for the loss of tuning data.
