### Customer states:

- The EPC light is ON.
- “Drive system: fault” appears in the instrument cluster.

### Workshop findings:

The following DTC is stored in the ECM, J623 (address word 0001):

- **P060C00** Internal Control Module Main Processor Performance” with Symptom code: 44160.

## Technical Background

Under analysis.

## Production Solution

Not Applicable

## Service

1. Clear the DTC P060C00 and return the vehicle to the customer.
2. Explain to the customer that a solution is expected to be available by the end of the 1st quarter of 2024 (subject to change) and that no repairs are necessary at this point. Do not replace any components for this condition since this will not resolve the customer’s concern.
3. Create a PSS record in the PSS application through the Pending Service Solutions (PSS) link in AccessAudi (under *Related Links* >> *Service*).

## Warranty

This TSB is informational only and not applicable to any Audi warranty.

## Additional Information

All part and service references provided in this TSB (**2070571**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
