**Subject: 2015 Volkswagen Jetta – Market Introduction
Temporary Warranty Process and Parts Return Program
(US Dealers Only)**

Date: August 22, 2014

Please see important changes in process

Effective: From repair date September 15th, 2014 to December 12th, 2014

Model: Volkswagen Jetta

Model Year: 2015

During the Market Introduction of the new Jetta, Volkswagen will collect all warranty repair information to ensure prompt analysis and resolution of any emerging concerns.

- **After performing the preliminary diagnosis, you must create a Volkswagen Technical Assistance (VTA) ticket and call the Technical Helpline prior to performing any repairs.**
 - A separate VTA case number is required for each line item of warranty repair. This excludes all Required Vehicle Updates (RVU) and Campaign Circulars. (Be sure both RO Number and RO Date are entered correctly in all VTA cases)
- All Volkswagen Technical Assistance cases will need to be "CLOSED" at the completion of the repair.
- Dealers will be notified after Volkswagen Technical Assistance case closure of part return requests.
- **Only warranty claims with a closed Volkswagen Technical Assistance case number in the Comments field and verified return parts will be processed for reimbursement.**

Program Highlights: Dealership technicians must create a VTA case for every warranty repair using ElsaWeb and select concern group **"2015 Jetta – All concerns"**.

- Call the Volkswagen Technician Helpline with your Volkswagen Technical Assistance access code: **1-800-678-2389**.
- Select the option: prompt 1 to enter the access code given from ElsaWeb.
- The technician must perform a preliminary diagnosis on each concern reported by the customer and obtain a Volkswagen Technical Assistance (VTA) access code **before contacting** the Volkswagen Technician Helpline.
 - **Note: Attachments will be mandatory. To be able to generate an access code you must have an attachment.** This includes pictures and/or complete GFF logs electronically to the VTA case (GFF Paperless is not acceptable due to delays in uploads). Instructions on how to attach items to the VTA case and why they are needed can be found in Service Net. (Technician References>Technicians Helpline>Job Aid)
- The technician must provide complete repair information in the VTA system prior to closing a VTA case.
- **If a part is ordered, the technician must obtain a Parts Sales Document number and enter it into the space (Sales Doc #) provided in the preparedness questionnaire.**
- **If any part(s) are replaced, please document the Part Numbers in the space (Parts Replaced) provided in the preparedness questionnaire.**

Service Information

- If a Vehicle leaves the Dealership with the Customer for any reason the VTA ticket should be closed with the latest information available. If vehicle is leaving due to parts being ordered, a new VTA ticket will be required when parts are replaced to verify repair path.
- See Service Information-Support document: VSS-08-12 "Technician Preparation when Calling the Volkswagen Dealer Technician Helpline".
- The Volkswagen Technician Helpline consultant will provide a Volkswagen Technical Assistance case number for each properly documented concern (repair) on the repair order brought up by the technician.
 - **Note:** This number is different from the access code generated when creating a case in ElsaWeb. The case code has a 2 digit letter code then a series of numbers. (Example FE-1234). This number is only given once the dealer calls the Technical Helpline and the case is accepted by a Helpline Consultant.
- The Volkswagen Technical Assistance case number(s) and closure date for each repair must be written on the back of the repair order alongside the technician punch time for the applicable repair (ERO dealers enter the contact number under the description of the repair information), and entered in the Comments Field of each eligible warranty claim.

Warranty and Parts Return Process:

- The Volkswagen Warranty Parts Return Center will notify the dealership of a part return on all closed Volkswagen Technical Helpline case numbers within one (1) business day.
Warranty Parts Return Center personnel will:
 - Create a shipping request in the Warranty Parts Shipping Portal (WPSP).
 - Create and email a Warranty Part Shipping Request form for each part request
 - Follow up with the dealership if the requested part(s) is not picked up by FedEx in 48hrs.
- Dealership personnel should:
 - Monitor the Outstanding Warranty Parts Report in WPSP for new requests.
 - Print the pre-addressed shipping label from the WPSP
 - Return the requested part(s) with repair documentation and a printed copy of the VTA case to the Warranty Parts Return Center same day.
 - Enter the warranty claim into SAGA within 24 hours of repair.
- Replaced parts on the warranty claim will be requested through SAGA with the exception of Hazard Material (HAZMAT) parts.
- In the event a HAZMAT part (airbags, seat belts, batteries, etc.) is requested through SAGA contact the Warranty Helpline: 866-306-8447
- HAZMAT parts will be requested on a case-by-case basis during the launch. Your dealership will be contacted with a request for HAZMAT parts. Parts should be shipped as outlined in the Warranty Parts Request User's Guide.
- Engines and Transmissions will be requested on a case by case basis. Your dealership will be contacted with a request for an engine or transmission. Follow the shipping guidelines as outlined in the Warranty Parts Request User's Guide.
- If requested parts are returned prior to receiving a SAGA part return request, email the Warranty Parts Return Center (vwoawprc@vw.com) with comments regarding the return and provide the FedEx tracking number.
- If the parts have not been returned at the time of claim submission, the SAGA barcode and required documentation (i.e. repair order and technician notes) should be sent with the requested parts.

Service Information

- A printed copy of the Volkswagen Technical Helpline case number as well as all applicable required documentation must be included when sending the requested parts.

Top Performing Dealers must return all requested launch parts. **The requirement for providing a Helpline Case Number per repair is still in effect when a QTM or resident engineer is directly involved in a repair procedure.**

Why attach Documents to the VTA; user information.

GFF / 00 / Collection Services:

Provides us with:

- Part numbers of Control Modules
- Hardware/software versions / levels
- All faults, even the ones related but occasionally overlooked
- Provides specific module coding
- Test Plan results or failures
- Scan tool Base and Brand version levels
- Base line of vehicle configuration

Pictures and Video w/sound:

Provide us with:

- Visual documentation of Fit, Finish or Color.
- Visual location of condition
 - Pictures should include – 3 Views

Overall location on vehicle

Location on panel or body

Complaint of Component

- Assists consultants in seeing and hearing what techs are experiencing

Detailed Worksheets:

Service Information

Provides us with:

- Exact readings and values pertaining to specific problems.
- Specific information needed for root cause analysis.

GFF Paperless is not acceptable due to delays in uploads.

What to attach:	Preferred	Accepted
Check engine light on:	GFF Log	
Drivability concern, no Check Engine light	Collection services / GFF log	GFF log /Collection Serv.
