

Volvo VHD & VN Models - Vehicle Will Not Start, PTO Active Message Displayed In Cluster, PTO Light On When PTO Switch Is Turned Off

Published: 8/29/2023

Certain vehicles may experience a no-start condition: a message is displayed on the Driver Information Display (DID) that the PTO is active and the PTO light is illuminated while the PTO switch is turned off.

This condition may be caused by body builder harnesses 3 and 4 being unintentionally connected together. See the pictures below.

- Disconnect the two harnesses and verify that the no-start condition has cleared.
