

## Wheezing Noises From The Front Shock Absorbers When Passing Over Surface Undulations And Rough Road

---

Topic number	LI32.25-P-076956
Version	1
Function group	32.25 - Shock absorbers, damper struts, spring struts
Date	10/10/23
Validity	Model series 206, 214, 236, 254 with steel suspension
Reason for change	

---

### Complaint

Wheezing noises from the front shock absorbers when passing over surface undulations and rough road.

The noises may become more conspicuous with warm damper oil.

### Cause

The flow noises of the damper oil are currently being analyzed.

### Remedy

The wheezing noises are currently considered standard for the series.

Replacing the shock absorbers will yield no benefit and will not remedy the problem.

Please report complaints regarding these wheezing noises via TIPS.

Symptoms
Chassis/suspension > Suspension/Dampening > Suspension system noises > whistles/hisses
