# Rapid Update 631 – STOP Field Action

DATE: January 22, 2024

Rapid Update #**631**, which was opened to carry out an inspection of 8 ground points and possibly cleaning the eyelet terminals of residual glue on certain Granturismo (M189) MY24 will be **closed starting from February 5<sup>th</sup>, 2024**. Claims received after that date will no longer be accepted.

**Reason:**

Upon further analyses carried out, no critical issues emerged from the presence of glue on the eyelets and therefore it was no longer necessary to remove the glue.

Contact your Regional AfterSales Manager (RAM) or the Technical Support Helpdesk if you have any questions.

Thank You for your continued support and cooperation.
