

Active "Set Park Brake" Message On Drivers Information Display (DID)

Published 16 February 2024

Valid For

All Mack and Volvo models 2008 to Current

Some vehicles may exhibit an active "Set Park Brake" Message on the Drivers Information Display (DID) when the truck comes to a stop.

If the "Set Park Brake" Message becomes active at a stop:

- Verify the courtesy light on the bottom of the door goes out with the dome light.
- If the courtesy light stays on disconnect the door switch and verify the DID message is still active. If the DID message is inactive verify the door is aligned properly and the door switch is functioning correctly.
