

# Preliminary Information

## PIT5838B Information On Normal Brake Noise

### Models

Brand:	Model:	Model Years:	VIN:		Engine:	Transmissions:
			from	to		
Chevrolet	Silverado MD 4500 5500 6500	2019 - 2024	All	All	All	All

Involved Region or Country	North America
Condition	A vehicle may have a concern of a brake noise or moan may be heard at the beginning of drive-off from a complete stop.
Cause	This concern may be considered normal.

### Correction:

Under certain conditions a brake noise or moan may be heard at the beginning of drive-off from a complete stop. This noise will go away after a short distance and with acceleration and is not an indicator of brake function or performance degradation.

If the noise continues after a period of driving at speeds >5 mph and other conditions such as vehicle pull, hot smelling or smoking brakes occurs, that can be a sign of brake drag and the vehicle brake system should be inspected as soon as possible.
