Case Number: S2008000154 Rev. F

Release Date: January 2024

Symptom/Vehicle Issue: B1053-64 RFHM (Kin Communication) - Signal Plausibility Failure Set In The RF Hub. Unable To Shut Off Ignition, EVIC Displays Service Passive Entry

Discussion: The customer may state the vehicle cannot be shut off and the message “Service Passive Entry Vehicle Will Not Shut Off Or Restart” is being displayed in the EVIC. The customer may also indicate the Passive Entry System does not function. Upon scanning the vehicle for DTC’s you will find B1053-64 RFHM (Kin Communication) - Signal Plausibility Failure set in the RF Hub.

Repair: Engineering has made software updates available for the Radio Frequency HUB (RFH), update the software to most current software level to resolve this complaint. **Replacement of the RFH or any other components will not resolve this exact issue.**

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.

Contact STAR Center, or your Technical Assistance Center Via TechCONNECT or eCONTACT ticket if no solution is found

If needed:

As an interim resolution for the vehicle not shutting off, perform the procedure outlined below to shut off the ignition.

Note: Ensure the vehicle is parked in a safe location which is accessible by a tow vehicle. The vehicle WILL NOT RESTART after performing this procedure unless the fault is cleared or the battery is disconnected

Step 1: Using the EVIC Controls, enter to the “Settings” Menu
