## Fuoriserie - Nero Cometa Paint Features

DATE: February 23, 2024

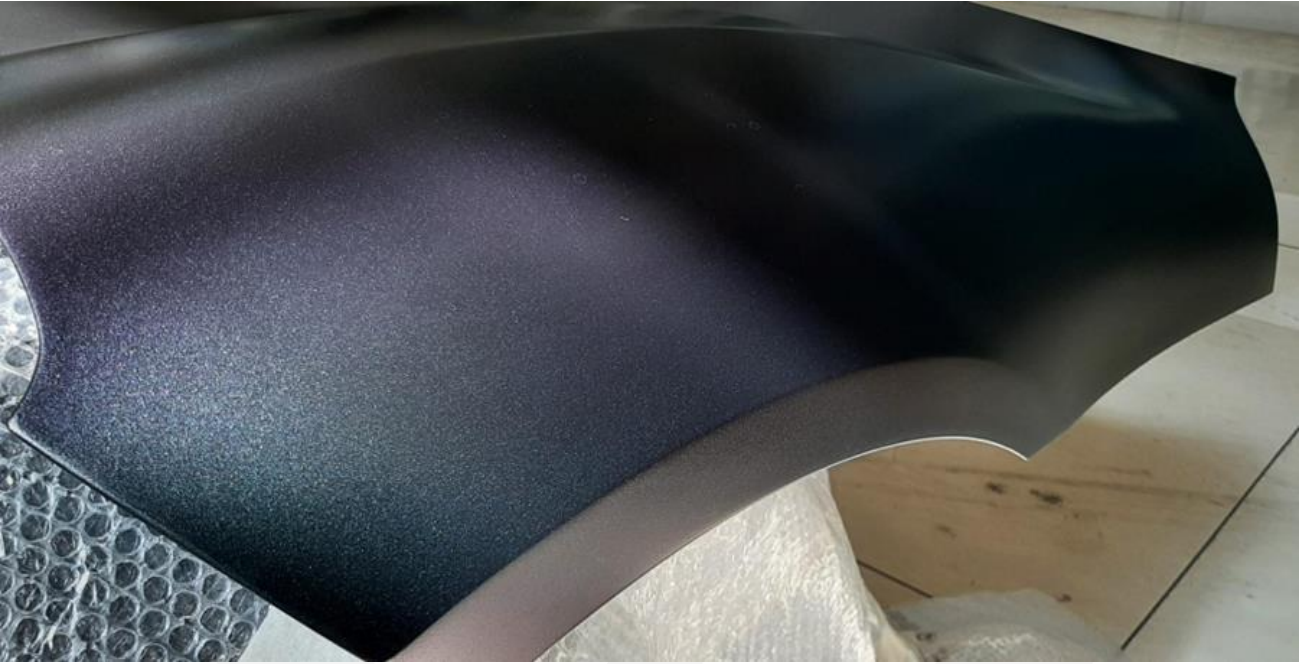

This Technical Information bulletin is issued to share the peculiarities of the Black Comet color and avoid potential reports of unjustified non-compliance of the paintwork.

**MODEL:** M189 New Granturismo All MY

The paint "Nero Cometa", developed for new Maserati Granturismo is a particular triple-layer matte finish (specific primer, comet black matte base, glossy clearcoat, textured clearcoat) applied to the car using specific airbrushes and highly specific manual application.

The paint generated features on the car creates a finely textured skin effect with iridescent reflections that "light up" at different angles when exposed to sunlight.

The texture, produced by the last layer of textured transparent, also adds to the uniqueness of the color and tactile sensation that every owner of a GT will be able to appreciate by touching the car.

Apparent streaks with transitions between opaque and transparent or roughness of the paint surface are specifically created to generate the desired textured effect.

Please do not hesitate to contact us for any questions you may have.  
Kind regards,
