End of support for Quattroporte (M156) and Ghibli (M157) on MD

DATE: February 19, 2024

Dear Sirs,

We inform you that due to Cybersecurity constraints, the XP based systems can no longer support the vehicles with the "Powernet" electronic architecture.

Therefore, the Maserati Quattroporte (M156) and Ghibli (M157) have been removed from the selection menu on the Maserati Diagnosi (MD) and will be no longer supported by the servers when using a MD tool, in alignment with the MD Virtual Machine on the MDEVO tools.

All the Maserati vehicles will continue to be supported on the MDEVO tools (all generations).

If you have any questions, contact your Regional AfterSales Manager (RAM) or the Technical Support Helpdesk. MaseratiTechSupport@maserati.com.
