SUBJECT: Skyactiv Transmission Part Lookup

Due to limitations, certain vehicles from 2016 to current models might display an inaccurate transmission part number in the Global Electronic Parts Catalog (GEPC). To provide support in such cases, a temporary lookup guide has been developed for assistance.

Please [click here](#) to view the excel lookup.

NOTE: Some vehicles display the correct transmission part number by using standard part lookup in GEPC. The results using the Lookup tool will advise "Check GEPC for Part Number" when the GEPC should be referenced for the correct part to VIN application.
