What's In This Update?

Ford Power-Up

Recall 23S37

We updated your front windows to fix a potential safety concern with those windows not automatically reversing when an obstruction is encountered in a low power condition. This completes safety recall 23S37. There is nothing more you need to do for this recall.

Ford Power-Up software updates like this let us handle recalls without asking you to leave home. At Ford we value your safety.
