

Software Update 6.1.0

Software Updates are designed to help make your vehicle better over time.

1

Enhanced Stability

- Your vehicle's Software Update system is designed to manage its resources behind the scenes with greater efficiency, contributing to smoother operation and a more consistent update experience.
- This update improves the way your vehicle receives and transmits software resulting in a more dependable update experience.

2023 Super Duty (F-250, F-350, F-450, F-550)

6.3.0

Software Update 6.3.0

Software updates are designed to help make your vehicle better over time.

*Record Feedback is available in the U.S. only.

1

Multiple Enhancements for Your Journey

Enhanced Rear View

- We've refined your vehicle's rear camera display for a cleaner view, making it easier to see what's behind you for improved convenience.

Simplified Update Process

- Get clear guidance if a software update needs your attention and timely reminders for your next scheduled update, helping you manage your updates with minimal effort.

A Warm Welcome

- Your vehicle is ready to welcome you.
- As you approach, the Power Running Boards smoothly extend and lights gently come on, making every arrival a special moment.

Enhanced Rear Seat Alert

- We've enhanced your vehicle's system to remind you to check the rear seats after you turn off the ignition and open the door, to help check and keep your loved ones safe.

Voice Your Feedback

- Have thoughts to share? Your vehicle now lets you send voice messages to Ford, helping us stay connected and guide improvements in Ford vehicles.
- Please understand that while we eagerly listen to all feedback, we may not respond directly to each message. For immediate assistance or safety concerns, we encourage you to contact your local dealer.
- To begin, navigate to the Features tab in your vehicle's center screen and select Record Feedback.
