SUBJECT:	LEATHER STEERING WHEEL CLEANING		

Description:

Some vehicles may exhibit dirt or buildup on the leather steering wheel. If any of these conditions are found, do not replace the steering wheel. Instead, follow the cleaning procedure described below.

NOTICE

The steering wheel does not need to be removed to perform the cleaning procedure.

Applicable Vehicles:

- All vehicles equipped with leather steering wheels.

Warranty Information:

Normal warranty applies.

Circulate To: General Manager, Service Manager, Parts Manager, Warranty Manager, Service Advisors, Technicians, Body Shop Manager, Fleet Repair

Parts Information:

Supplies can be sourced through local markets.

Description	Contents
3M Leather & Vinyl Restorer 39040 or Equivalent	
3M Scotchbrite Cleaning Pad 7439 or Equivalent	
3M Microfiber Cloth 6016 or Equivalent	
Disposable Latex or Nitrile Gloves	

CLEANING PROCEDURE:

1. Spray the leather restorer onto the microfiber cloth.

> **NOTICE**
>
> **The steering wheel does not need to be removed to perform the cleaning procedure.**

2. Using the microfiber cloth, rub the leather restorer into the steering wheel. Wipe any leftover residue with a clean portion of the cloth.

3. For heavier dirt and buildup, spray a cleaning pad with leather restorer and scrub the steering wheel. Wipe the residue off with a clean microfiber cloth.

Steering wheel shown partially cleaned to demonstrate cleaning results.

4. Close up of steering wheel clean.

> ⚠ **CAUTION**
>
> **Do not leave the steering wheel wet or slippery. Wipe any residue off of the steering wheel.**
