Condition					
on the multi-information display is greved out and not selectable					
on the multi-mormation display is greyed out and not selectable.					
RECOMMENDATIONS					
HINT: By default, the customer's cell phone automatically syncs to the vehicle's system and					
downloads the call history/contacts from their phone on all phones which support PBAP (Phonebook					
Access Profile). This profile is present in nearly every phone running Bluetooth 2.0 or greater.					
You will have to disable the vehicle's cutometic download facture in order to delete cell bioters or					
rou will have to disable the vehicle's automatic download feature in order to delete call history or					
contacts using the multimedia system.					
To disable the automatic download, enter this sequence into the multimedia system:					
Setup \rightarrow Phone \rightarrow Phonebook \rightarrow Manage Contacts					
Once you are in the Manage Contacts many. Turn "Automatically Devenland Call History" off to another					
the ability to delete call history in the vehicle, and turn "Automatically Download Call History" off to enable					
enable the ability to delete contacts in the vehicle
