**CONDITION**

Below are step-by-step instructions on how to remove and install the Service Plug.

NOTE: If these steps are not followed, it's possible to damage the Service Plug installation/removal mechanism.

WARNING: Make sure that the locking lever is vertically positioned before reinstalling the Plug.

**RECOMMENDATIONS**

Please refer to the Toyota RAV4 EV Repair Manual section for precautions when working on high voltage components/systems. Links to the Repair Manual are located at the end of this document.

Engine/Hybrid System\HYBRID / BATTERY CONTROL\HYBRID CONTROL SYSTEM\PRECAUTION (2012 RAV4 EV): HYBRID / BATTERY CONTROL: HYBRID CONTROL SYSTEM

2013 RAV4 EV (RM2510U):

Engine/Hybrid System\HYBRID / BATTERY CONTROL\HYBRID CONTROL SYSTEM\PRECAUTION; 2013 MY RAV4 EV [12/2012 - ]

Some of the information from the Repair Manual is repeated below for quick reference:

**PRECAUTION****1. PRECAUTIONS FOR INSPECTING ELECTRIC VEHICLE CONTROL SYSTEM**

- (a) Before inspecting the high-voltage system or disconnecting the low voltage connector of the electric vehicle traction motor assembly (inverter), DC/DC converter assembly, electric vehicle battery assembly or electric vehicle charger assembly, take safety precautions such as wearing insulated gloves and protective goggles, and removing the service plug grip to prevent electrical shocks. After removing the service plug grip, attach a note to it to prevent other technicians from mistakenly reconnecting it while you are working on the high-voltage system.

Instructions****USA**

Applicability

**RAV4 EV****NOTICE:**

- After turning the power switch off, waiting time may be required before disconnecting the cable from the negative (-) auxiliary battery terminal. Therefore, make sure to read the disconnecting the cable from the negative (-) auxiliary battery terminal notices before proceeding with work.
- After removing the service plug grip, turning the power switch on (READY) may cause a malfunction. Do not turn the power switch on (READY) unless instructed by the repair manual.

(b) After removing the service plug grip, wait for at least 10 minutes before touching any of the high-voltage connectors or terminals.

**CAUTION:**

Wear insulated gloves and protective goggles.

**HINT:**

Waiting for at least 10 minutes is required to discharge the high-voltage capacitor inside the electric vehicle traction motor assembly (inverter), DC/DC converter assembly, electric vehicle battery assembly and electric vehicle charger assembly.

## INSTALLATION INSTRUCTIONS:

**WARNING:** Make sure that the locking lever is vertically positioned before reinstalling the Plug. If the locking lever is in the half-way open position (45 degrees) and the Service Plug is reinstalled in the vehicle, the vehicle may not READY-ON, because the Service Plug is not properly installed.

1. Fully seat the Service Plug in its mounting location (make sure that the locking lever is vertically positioned in its fully open position).
2. Push the locking lever down until it's fully seated in the horizontal position.
