

<b>Subject</b> <b>BeSpoke Premium Audio powered by ZYPR – Apple iPhone iOS 7.0 Update</b>		<b>Market</b> <b>USA</b>
<b>Service Category</b> Audio/Visual/Telematics	<b>Section</b> Navigation/Multi Info Display	
<b>Applicability</b> 13MY Scion iQ, FR-S, tC, xB, xD		

**APPLICABLE VEHICLES**

2013	xD	2013	FR-S
2013	xB	2013	tC
2013	iQ		

**CONDITION**

Customers with vehicles equipped with the premium head unit (BeSpoke powered by Zyr) who use an iPhone 4 or 4S that has been updated to iOS7 may experience a blank display when using the BeSpoke application on the head unit.

**RECOMMENDATIONS**

Pioneer has revised the 13MY “BeSpoke powered by Zyr” head unit software to work with an iPhone 4/4s + iOS7. If you have a customer experiencing the condition listed above, replace the radio through the Pioneer exchange program.

Note: This head unit software update only addresses the iPhone 4/4s with iOS7 compatibility. There are no added features or enhancements as a result of this update. Customers who do not use or plan to use the iPhone 4 or 4s BeSpoke application will not benefit from this update.
