REVISION NOTICE

April 9, 2013 Rev1:

- Applicability has been updated to include additional 2013 model year Lexus vehicles.
- Parts Information and Required Tools & Equipment sections have been updated.

Any previous printed versions of this bulletin should be discarded.

Introduction

Lexus models equipped with the Premium HDD Navigation (EMV-N) System require a Special Service Tool (SST) USB drive to update the map, points of interest, Gracenote®, and system software. The SST is used with all vehicles to deliver the update, however a unique Activation Number is required for each vehicle. Activation Numbers are provided in an Activation Card Number (ACN) pamphlet available through the normal parts ordering system. Use the process described in this bulletin to perform the update.

NOTE

- Gracenote® information must be updated at the same time as Map Data. This data is included on the Map Data SST.
- Map data will be released annually through the shipment of a USB Drive SST to each dealer. The SST must be stored in the SST cabinet to ensure it can be easily found.

Premium HDD Navigation Map Update Process (EMV-N)

Warranty Information

| OP CODE | DESCRIPTION | TIME | OFF | T1 | T2 |
|---------|----------------------------|------|-----|----|----|
| N/A | Not Applicable to Warranty | — | — | — | — |
