

# Service Bulletin

File in Section: 08 - Body and Accessories

Bulletin No.: 15-08-51-001B

Date: May, 2016

## INFORMATION

**Subject:** Availability of Insulator Service Part for Prevention of Liftgate Rust/Corrosion at Center Applique

**Models:** 2010-2015 Chevrolet Equinox  
2010-2015 GMC Terrain

**Attention:** This Bulletin also applies to any of the above models that may be Export to Middle East vehicles.

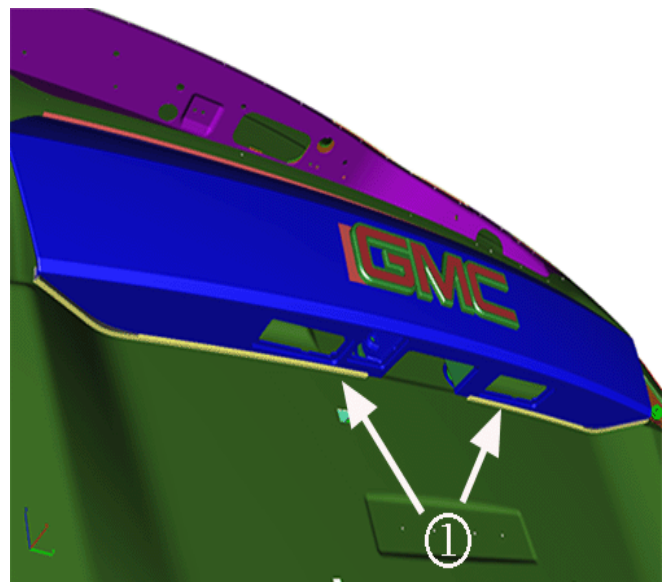

This Bulletin has been revised to update the Equinox model Parts Information. Please discard Corporate Bulletin Number 15-08-51-001A.

4252404

On some vehicles, due to the applique contacting and rubbing on the liftgate painted surface, rust spots (shown circled above) may be evident at the lower corners of the center chrome applique on the rear liftgate.

When repairing this rust spot condition, it will be necessary to remove the original applique, and repair any rust spot condition following common industry standards. Then, depending on model being repaired, follow the appropriate service part replacement advised below:

4252408

- **For Terrain models**, a two piece insulator is available as a service part, separate from the applique assembly. After repairing the rust condition, the new insulator parts (1) should be installed between the original applique and the liftgate. Refer to *Rear Closure Center Applique Insulator Replacement (GMC)* in SI.

- **For Equinox models with Rearview Camera (RPO - UVC)**, the insulator is part of the applique assembly. After repairing the rust condition, it will be necessary to install a new applique assembly. Refer to *Liftgate Applique Replacement (Equinox)* in SI.
- **For Equinox models without Rearview Camera**, the necessary stock of the service part is not yet available. The part acquisition is currently in process, and this bulletin will be updated as soon as parts become available.

**Parts Information**

Part Number	Description
23239250	INSULATOR-RR CLSR CTR APLQ (Terrain)
84048500	APPLIQUE ASM-RR CLSR CTR (Equinox with UVC)
