

Vehicle Electronic Control Unit (VECU), Reprogramming Fifth Wheel Slide CHU, CXU, GU, TD

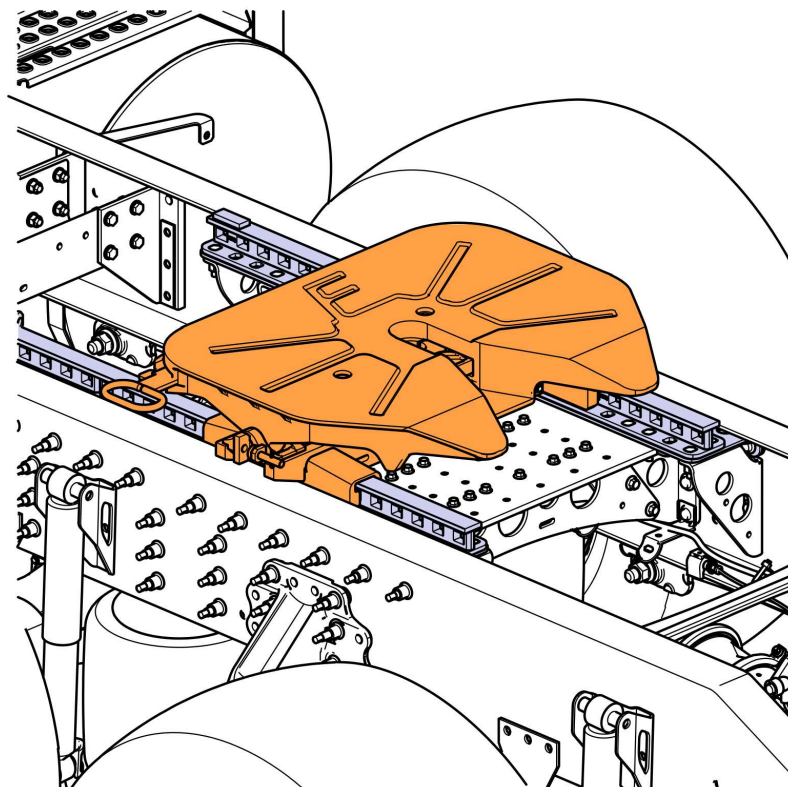

FSB 364-038, Vehicle Electronic Control Unit (VECU), Reprogramming

Fifth Wheel Slide

(November 2014)

Certain MACK CHU, CXU, GU, and TD trucks equipped with an air slide fifth wheel, and built 08/18/2014 through 11/07/2014, may display a "Fifth Wheel Slide Fault" message in the instrument cluster when the vehicle shuts OFF during Idle Shutdown. This condition is due to a parameter programming issue. The procedure outlined in this Field Service Bulletin (FSB) will reset the parameter correctly.

Note: This bulletin does not apply to MACK Trucks Australia.

Repair, Reprogramming Procedure

You must read and understand the precautions and guidelines in Service Information, group 80, "General Safety Practices, Body, Cab, and HVAC" before performing this procedure. If you are not properly trained and certified in this procedure, ask your supervisor for training before you perform it.

NOTE: Information is subject to change without notice. Illustrations are used for reference only and can differ slightly from the actual vehicle being serviced. However, key components addressed in this information are represented as accurately as possible.

- 1 Park the vehicle on a flat and level surface.
- 2 Apply the parking brake.
- 3 Place the transmission in neutral or park.
- 4 Install the wheel chocks.

W7086748

- 5 Using Premium Tech Tool (PTT), run Accessory kit 85143650.
- 6 Reprogram the Vehicle Electronic Control Unit (VECU) MID 144.
- 7 Verify proper operation after reprogramming is complete.
- 8 Remove the wheel chocks.
