2011-2017MY OIL FILTER APPLICATION – NEW SERVICE PART AVAILABLE

AFFECTED VEHICLES

- 2011-2017MY Isuzu N-Series
Equipped with 5.2L (4HK1) Diesel Engines

This bulletin supersedes information bulletin IB15-J-002. This bulletin is being revised to update Model Years. Please discard previous bulletin IB15-J-002.

INFORMATION

A new Isuzu oil filter is now available for 2011MY and newer Isuzu N-Series vehicles equipped with 4HK1 diesel engines. The new oil filter's bypass valve pressure has been changed to improve filtration in cold weather. As a result it is necessary for dealers to inventory this new oil filter cartridges for the affected model years (see Figure 1).

IMPORTANT: DO NOT install newer oil filters on older vehicles (2010MY and older), as it will result in turbocharger damage due to oil starvation of the turbocharger shaft bearings during cold weather conditions. Be sure to confirm correct oil filter application prior to installation.
