Skill Level: Repair Technician

CUSTOMER INFORMATION: The information in this bulletin is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely maintain your vehicle. These procedures should not be attempted by "do-it-yourselfers," and you should not assume this bulletin applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Honda automobile dealer.

REPAIR PROCEDURE

NOTE: When replacing the remote tuner unit, write down the audio unit radio presets (if possible), and enter them into the new tuner unit.

1. Open the caps, then remove the bolt and screw.

2. Pry out the covers and remove the screws. Then remove the tie down hooks.
3. Pull out the rear door opening seal and tailgate weatherstrip as needed.

4. Remove the rear side trim panel.

5. Disconnect the connectors, then remove the harness clip.

6. Remove the tuner unit.
7. Install the new tuner unit and torque the bolts to **9.4 N·m (6.9 lb-ft)**.
8. Reconnect the connectors and harness clip.
9. Install the trim panel.
