Symptom 203000 Basic Electrical   Content Issue Only applicable to software versions 30.3 (GEN 3) FK72-14C104-AF and 29.3 (GEN 2) DPLA-14C104-AG   When checking for fault codes logged in the KVM (keyless vehicle module) also known as the RFA (remote function actuator) FOC	Category	Electrical
Content Issue Only applicable to software versions 30.3 (GEN 3) FK72-14C104-AF and 29.3 (GEN 2) DPLA-14C104-AG When checking for fault codes logged in the KVM (keyless vehicle module) also known as the RFA (remote function actuator) FOC	Last modified	18-Sep-2015 00:00:00
Only applicable to software versions 30.3 (GEN 3) FK72-14C104-AF and 29.3 (GEN 2) DPLA-14C104-AG When checking for fault codes logged in the KVM (keyless vehicle module) also known as the RFA (remote function actuator) F00	Symptom	203000 Basic Electrical
DPLA-14C104-AG When checking for fault codes logged in the KVM (keyless vehicle module) also known as the RFA (remote function actuator) F00	Content	Issue
When checking for fault codes logged in the KVM (keyless vehicle module) also known as the RFA (remote function actuator) F00		Only applicable to software versions 30.3 (GEN 3) FK72-14C104-AF and 29.3 (GEN 2)
		DPLA-14C104-AG
63/U3000-63, Control Module - Circuit/ Component Protection Time-Out is logged.		When checking for fault codes logged in the KVM (keyless vehicle module) also known as the RFA (remote function actuator) F000-
Cause		Cause

This DTC is set when the KVM has gone through a "self reset"

## Action

This DTC will not have any effect on functionality. The module must not be replaced .Please carryout a DTC clear. There is a possibility that it will keep appearing

This issue will be resolved with a later release of software.
