

# Special Service Message

NOTE: A Special Service Message is a formal communication issued by Land Rover and carries the same importance of a Technical Service Bulletin. An SSM is a quick method of communicating "Need To Know" information to the technical service community. SSM's may be issued in advance of a technical bulletin or may be the only communication on a given topic. All information contained in Land Rover technical communications are intended for use by trained, professional technicians with the knowledge, tools, and equipment required to complete the procedure correctly and safely. It informs the Technicians of conditions that may occur on some vehicles, or provides information that could assist in correct vehicle and diagnostic service.

## SSM 72337 - HD Radio Sub- Channels Missing

**Models :** LC - Discovery Sport

**Engineer** Martucci Gregory

**Name :**

**Last** 13-07-2015 21:14:31

**Modified :**

**Category :** Electrical

**Symptom :** 207000 Entertainment Systems

**Content :** Issue: Customer may complain that they cannot tune to the HD radio sub-channels with HD radio turned on.

Cause: Audio Head Unit software concern.

Action: Should a customer complain that they cannot tune to an HD radio substation with HD radio turned on, program the Audio Head Unit (Low Line) as existing using SDD DVD 142 or later.
