The vehicle specification section assists you with better understanding your vehicle's standard and optional equipment, via VIN decode processing. These processes are generally reliable, and providers work to continually improve their decoding. However, different VIN decode processors may show different specifications. If you have questions, please check with your vehicle's manufacturer. Dealers/sellers also report installed option information, which is provided when available.

2 Junk/Salvage/Total Loss

Source NMVTIS

This section discloses events related to events like junk, salvage and insurance total loss that have been reported to VINData History. Included are state DMV titles that show junk, salvage or similar brands, insurance total loss events and salvage auctions or junk yard disclosures. Events related to an auto dismantler, auto recycler or crush facility indicate that the vehicle has sustained major damage. A vehicle that has been received by a salvage auction or junk yard usually indicates major prior damage, however these entities also remarket undamaged vehicles. We recommend an inspection by a qualified mechanic.

Warning - junk, salvage or insurance total loss events have been reported to VINData History.

2 Title Brands Reported

Source NMVTIS

Warning – at least one negative title or cautionary DMV title brands have been reported to VINData History.

Brand Issued Date	State	Brand	Description
07/10/2014	Florida	Rebuilt	Warning - the vehicle was reported by State DMV as previously branded "salvage", now has passed anti-theft and safety inspections, or other jurisdiction procedures, to ensure the vehicle was rebuilt to required standards. Also known as prior salvage (salvaged).
02/04/2014	Virginia	Salvage - Damage or Not Specified	Warning - the vehicle was reported by State DMV as Salvage -- Damage or Not Specified. Any vehicle reported by State DMV as having been wrecked, destroyed or damaged, to the extent that the total estimated or actual cost of parts and labor to rebuild or reconstruct the vehicle to its pre-accident condition and for legal operation on roads or highways exceeds a jurisdiction-defined percentage of the retail value of the vehicle. The retail value of the vehicle is determined by a current edition of a nationally recognized compilation (to include automated data bases) of retail values. The Salvage--Damage or Not Specified brand also includes any vehicle reported by State DMV for which an insurance company acquires ownership pursuant to a damage settlement, or any vehicle that the vehicle's owner may wish to designate as a salvage vehicle by obtaining a salvage title, without regard to extent of the vehicle's damage and repairs, or any vehicle for which the jurisdiction cannot distinguish the reason the vehicle was designated salvage.

Possible Title Brands

Source NMVTIS

VINData History reports can show one or more of the following DMV state title brands. When there are NMVTIS title brands, they are reported in the Title Brands Reported section . To see the descriptions, hover over or click on the brands below. The red, yellow and green indicators show how the brand would be reflected if it was reported for this vehicle.

NMVTIS Consumer Access Product Disclaimer

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that contains information on certain automobiles titled in the United States. NMVTIS is intended to serve as a reliable source of title and brand history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information to NMVTIS. However, NMVTIS does not contain information on all motor vehicles in the United States because [some states](#) are not yet providing their vehicle data to the system. Currently, the data provided to NMVTIS by states is provided in a variety of time frames; while some states report and update NMVTIS data in "real-time" (as title transactions occur), other states send updates less frequently, such as once every 24 hours or within a period of days.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are **strongly encouraged to also obtain an independent vehicle inspection** to ensure the vehicle does not have hidden damage. The [Approved NMVTIS Data Providers](#) (look for the NMVTIS logo) can include vehicle condition data from sources other than NMVTIS.

NMVTIS data **INCLUDES** (as available by those entities required to report to the System):

- Information from [participating](#) state motor vehicle titling agencies.

- Most recent odometer reading in the state's title record.
- Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law to be reported to the system, beginning March 31, 2009. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.
- Information from junk and salvage yards receiving a "cash for clunker" vehicle traded-in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit www.vehiclehistory.gov for details on how to interpret the information in the system and understand the meaning of various labels applied to vehicles by the participating state motor vehicle titling agencies.

VINData Products Consumer Access Product Disclaimer

The compilation of VINData Products services, VINData Vehicle History and Title Reports and other history and related products, use data from multiple third party data suppliers and other various data sources which may supplement data supplied by NMVTIS or its sources. Sections of this Vehicle History Report are based on NMVTIS data and NMVTIS data sources as indicated. Thus, the above Consumer Access Product Disclaimer applies solely to NMVTIS data and NMVTIS data sources. NMVTIS provides data directly from its databases to VINData Products consumers through the AAMVA tested and approved VINData Products interface on a "read-only" basis. VINData Products does not supply or enter any data into the NMVTIS databases and is not responsible for supplying any data contained in any NMVTIS Vehicle History Report. Therefore, VINData Products cannot warrant or guarantee the accuracy of any information contained in any NMVTIS Vehicle History Report data.

In the event that NMVTIS Vehicle History Report Data shows current and historical states of title, as provided in any NMVTIS Vehicle History Report, VINData Products consumers have several options regarding full vehicle history records from the current and historical states of title. These records, if such records exist, are available for purchase. Please contact customerservice@vindata.com. Should you require more information, please contact the state of current title and the state of historical title as provided on your Report. This information is subject to change from time to time and is accessible here: [/AAMVA-state-list](#)

Glossary

Information to help you better understand information provided to you in the VINData History report. Please see the report sections page, FAQ, terms of service and disclaimer for more information.

General Terms

Towing/Impound:

Towed or impounded by entity for various reasons, including (but not limited to) abandonment or repossession.

Recalls:

The vehicle's manufacturer, or NHTSA (National Highway Traffic Safety Administration) has determined that the vehicle has a safety or other defect that can affect the vehicle's safety or driveability. Recalls can be repaired at no cost at a manufacturer's franchise dealership.

Title:

Official state DMV document that identifies the vehicle, any lienholder and owner. Rules governing issuance are specific to each state.

Title Brands:

Letter or number on a DMV issued title that signifies a permanent designation by a state, indicating a specific condition. Some title brands like salvage mean the vehicle has been declared a total loss due to damage; others simply declare a vehicle has been titled as an antique or is being used for agricultural purposes.

Junk or Salvage event (from NMVTIS):

Vehicle was seen at a junk yard, wrecker, dismantler or crusher, or seen at a salvage yard or salvage auction. These vehicles can range from inoperable to fully driveable with little or no actual damage.

Odometer Reading:

Distance (in miles or kilometers) that the vehicle has traveled. Over time, the mileage reported should increase. Many vehicles are driven 10,000-15,000 miles a year; others more or less.

Warranty:

Manufacturer's guarantee or promise to repair or replace defects, usually within a certain time or mileage.

Event Date or Date Applied:

Date the event was reported to have occurred.

[Order Now](#)

Wholesale Prices (MMR):

Information about the valuation of the vehicle at the auction.

Retail Prices (MMR):

Information about the expected value of the vehicle in the consumer market.

Above Average (MMR):

One standard deviation above the average valuation.

Average (MMR):

Average valuation of the vehicle.

Below Average (MMR):

One standard deviation below the average valuation.

Historical Prices (MMR):

Information about average odometer readings and price values for past periods.

Forecast Prices (MMR):

Information about the predicted MMR for the vehicle.

Average odometer (MMR):

Average odometer reading for the vehicles used in the valuation calculation.

Average Grade (MMR):

Average vehicle condition grade of the valuation. Grades are between 1.0 (poor) to 5.0 (excellent).

Sample Size (MMR):

Total number of transactions supporting the base MMR.

Values - Black Book

Wholesale Value (Black Book):

The price a dealer would pay at a wholesale dealer-only auction, or the price that a dealer would independently sell a car to another dealer.

Retail Value (Black Book):

The listing price a dealer would ask for a vehicle available for sale, determined by compiling dealer asking prices.

Vehicle Value:

Monetary vehicle values as calculated by third party companies.

Trade-in Value (Black Book):

The price a dealer would offer a consumer for their vehicle to apply toward the purchase of another car in the dealer's inventory.

Private Party Value (Black Book):

The price you could expect for a vehicle sales transaction between two consumers. Depending on demand and condition, this transaction value will be below the retail value. Private Party transactions are typically less than dealer sales because they do not provide the buyer any financing options, warranty, nor any recourse, should there be any problems with the vehicle. All sales are usually considered final and as is.

Clean Condition (Black Book):

Very little interior or exterior wear. The vehicle is 100% mechanically sound. Any paint repair is almost unnoticeable. The vehicle should be accompanied by a clean history report. All tires should fully match and have good to excellent tread. There should be fewer than average miles for the model year.

Average Condition (Black Book):

The vehicle is solid with substantial serviceable life remaining, but normal interior and exterior wear is allowable. Any previous paint repair must only be apparent to the trained eye. There could be minor mechanical, or maintenance work required. Tires should be in average condition or better and there should be typical miles for the model year.

Rough Condition (Black Book):

The interior and exterior will show more than normal and expected wear and tear. The vehicle could have excessive miles for the model year and may be approaching the end of its serviceable life. The vehicle could have had previous body damage with possible sub-par repairs. There could be cracked glass. The interior could be torn, stained and have adverse odors. There could be physical or mechanical repairs needed. Tires could be worn and/or mismatched. A negative vehicle history with title brand like salvage, frame damage or mileage discrepancy would push the condition to below Rough condition.

schedule. Tires should be like new and completely matching, including the spare.

Data Sources

Your VINData History report checks for and reports information from the following high-quality data sources. Please see our report sections page, FAQ, terms of service and disclaimer for more information.

POWERED BY

**BLACK
BOOK**

Black Book(R) is a leading provider of vehicle values, bringing VINData History auto values, including pickup trucks and SUV values, RV values, motorcycle values, commercial truck values, and classic car values. Black Book also provides vehicle specifications used by VINData History.

Copyright © 2020 Hearst Business Media Corp. ALL RIGHTS RESERVED. Black Book® is a registered trademark of Hearst Business Media Corp. Black Book is not a participating partner in or sponsor of this Report. Prices are based on Black Book® (clean/average/rough) Trade-in/Retail value and subject to adjustment for mileage and condition.

J.D. POWER 

In 2015, J.D. Power brought together its industry-leading new car retail intelligence capabilities with the industry's most trusted source for used-vehicle valuations through its acquisition of NADA's Used Car Guide division. In 2017, the company further expanded its valuation offerings through the acquisition of National Appraisal Guides and NADAguides.com, adding motorcycles, RVs, classic cars, boats, and manufactured homes to create the most comprehensive and trusted source for vehicle pricing and information in the industry.

J.D. Power is a leader in providing vehicle data and information to both the consumer and commercial markets, and counts among its customers the nation's leading banks, credit unions, fleet and lease organizations, auto dealers, insurance companies, and government agencies. The company delivers its accurate and reliable values and insights through a variety of products offered through online and mobile applications, and printed guidebooks.

 **Manheim**

VINData History Reports for auto dealers and other commercial users provide Manheim Market Report (MMR) values. MMR is the premier indicator of wholesale prices. MMR helps users research vehicle values quickly and easily. Valuations are based on millions of wholesale transactions from the previous thirteen months, and are refreshed each night. For additional details, please see "MMR Under the Hood" on Manheim.com.

Dealers and other commercial uses: please contact us to get MMR values added to your reports.

 **NHTSA**

The National Highway Traffic Safety Administration (NHTSA) is responsible for keeping people safe on America's roadways. Through enforcing vehicle performance standards and partnerships with state and local governments, NHTSA reduces deaths, injuries and economic losses from motor vehicle crashes. NHTSA provides vehicle specifications and vehicle recalls like Takata airbag recalls.

 **NMVTIS**[®]
National Motor Vehicle Title
Information System

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that provides consumers with valuable information about a vehicle's condition and history. Prior to purchasing a vehicle, NMVTIS allows consumers, dealers, wholesale auctions, vehicle lenders and insurers to find information on the vehicle's title, most recent odometer reading, brand history, and, in some cases, historical theft data. See NMVTIS Consumer Access Product Disclaimer
